

Time: Wednesday, 2009/02/04, 6:45 PM [Welcome Time: 6:30 PM]

Location: Building SW3 room 1750, BCIT Burnaby Campus, 3700 Willingdon Ave, Burnaby, BC, V5G 3H2

Topic: Team Integration with Team Foundation Server 2008

Map of BCIT Burnaby campus: <http://www.bcit.ca/files/about/pdf/bcitmap.pdf>

Snacks: pizza and pop sponsored by Burntsand , Registration: not required

Summary:

One of the biggest challenges facing application development teams is the efficient integration of the various team members and roles within a unified application lifecycle management process. This presentation will demonstrate how Team Foundation Server 2008 can be utilized to efficiently integrate both business and technical team members while also improving your overall application development quality and efficiency.

Speakers:

Graham Sibley – Solution Architect at Burntsand

Graham has been developing and architecting Microsoft solutions for over 10 years, with a focus on collaboration and Application Lifecycle Management solutions. In addition to his role as a Solution Architect at Burntsand, Graham has also created and released a Visual Studio integrated model-driven development application called Viewpoints. Graham was a finalist for the MSDN Canada Code Award for 2008.

Ryan Jaeger – Senior Developer at Burntsand

Ryan has been developing Microsoft applications for over 5 years, with a focus on collaboration and workflow solutions. He has been building .NET solutions at Burntsand for over 2 years, including many projects with SharePoint, mobile devices, and workflow.
