Don't be left behind

Come learn about all the exciting changes in **Visual Studio 2010**

Join us in a city near you as we present a comprehensive overview of the capabilities and licensing changes coming with [Visual Studio 2010](#).

This new release introduces an exciting set of additional functionality in areas such as **architecture, modeling, testing, quality assurance, and team management**. These new features extend the capabilities of Microsoft's ALM solution in rich new ways to improve your ability to build quality software and execute on business projects.

This event will explain the recently announced major changes in the product line-up for Visual Studio 2010 and MSDN subscriptions. As well, we will cover the [Ultimate Offer](#) an upcoming version step-up program that will impact all current users of Visual Studio with MSDN Premium subscriptions.

Come and discover what's new with the products, capabilities, and licensing of Visual Studio Team System.

[Register today](#) before these events reach capacity.
